

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on **Answer Sheet 2** with a single line through the centre. You may not use any of the words in the bank more than once.

Let's say you love roller-skating. Just the thought of 26 on your roller-skates brings a smile to your face. You also know that roller-skating is excellent exercise. You have a 27 attitude toward it.

This description of roller-skating 28 the three components of an attitude: affect, cognition, and behavior. You love the activity; it's great fun. These feelings 29 the affective or emotional component; they are an important ingredient in attitudes. The knowledge we have about the object constitutes the cognitive component of an attitude. You understand the health 30 that the activity can bring. Finally, attitudes have a behavioral component. Our attitudes 31 us to go outside to enjoy roller-skating.

Now, we don't want to leave you with the 32 that these three components always work together 33. They don't; sometimes they clash. For example, let's say you love pizza (affective component); however, you have high cholesterol and understand (knowledge component) that eating pizza may be bad for your health. Which behavior will your attitude result in, eating pizza or 34 it? The answer depends on which component happens to be stronger. If you are walking past a pizza restaurant at lunchtime, your emotions and feelings probably will be stronger than your knowledge that pizza may not be the best food for your health. In that instance, you have pizza for lunch. If you are at home trying to decide where to go for dinner, however, the knowledge component may 35, and you decide to go where you can eat a healthier meal.
